

# ENVIROSCAPE

The EnviroScape is a large, portable classroom model used to learn about the flow of water and pollutants in Earth's water systems. Suitable for upper elementary and middle school.

There are six different EnviroScape models:

- ◆ Hazardous Waste
- ◆ Drinking Water
- ◆ Wetlands
- ◆ Coastal
- ◆ Wastewater Management
- ◆ Non-Point Source Pollution

Teachers from districts that participate in ESP services and who attend an EnviroScape training session are able to borrow an EnviroScape to use in their classroom at NO CHARGE!
